To Whom It May Concern,

We had the opportunity to work with Panels Plus, Inc. on a project that involved USDA compliance and GMP acceptance. Meat processing plants with their required low temperature warehouse size coolers and freezers require a contractor with knowledge and experience. Panels Plus exceeded my expectations, period. The pricing was very competitive, the design assistance was excellent, and the finished product was outstanding. We had some field conditions that varied, and Panels Plus made accommodations that helped us keep within schedule and helped us and our client stay within our budget. They worked with my other contractors on site and helped keep things running smoothly.

I certainly will be calling Panels Plus, Inc. for any future food related or cold storage projects.

Sincerely,

Tony Andrews – President
